AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the

application:

Listing of Claims:

1. (Currently Amended) A charging system comprising a charging device

which includes an induction core penetratingwhich penetrates through a primary side

coil, and a portable equipment which includes an insertion portion including an

opening and containing a secondary side coil and allowingwhich allows said

induction core to pass therethrough.

2. (Currently Amended) A charging device for a charging system

having including the charging device which includes induction core

penetratingwhich penetrates through a primary side coil, and a portable equipment

which includes an insertion portion including an opening and containing a secondary

side coil and allowingwhich allows the induction core to pass therethrough, and

comprising said primary side coil, and a power feed portion.

3. (Currently Amended) A portable equipment comprising an insertion

portion including an opening through which an induction core of a charging device as

penetrates through a primary side coil thereof is allowed to pass, and in which a

secondary side coil for performing charging is contained.

Art Unit: 2684

4. (Currently Amended) A charging system comprising a charging device which includes a hook-shaped induction core penetratingwhich penetrates through a primary side coil, and a portable equipment which includes an opening containing a charging arch containing a secondary side coil and allowed which allows the portable

equipment to be suspensibly attached to said the induction core.

- 5. (Currently Amended) A charging device for a charging system having including the charging device which includes a hook-shaped induction core penetrating which penetrates through a primary side coil, and a portable equipment which includes an opening containing a charging arch containing a secondary side coil and is allowed to be suspensibly attached to the induction core, comprising a power feed portion, said primary side coil, and said hook-shaped induction core.
- 6. (Currently Amended) A portable equipment comprising a charging arch which is allowed to be suspensibly attached to a hook-shaped induction core of a charging device as penetrates which penetrates through a primary side coil thereof and which is provided at an end part of a body of the portable equipment, and a secondary side coil which serves to perform charging and which is contained in an annular space defined by said charging arch and a part under said arch.
- 7. (Currently Amended) A charging method for a portable equipment employing the charging system as defined in Claimclaim 1, comprising:

the step of installing said charging device;

Application No.: 09/894,883 Docket No.: 892.40310X00

Art Unit: 2684 Page 5

the step of passing said induction core through said

insertion portion; and

the step of holding said insertion portion and said induction core settogether for a predetermined time period.

8. (Currently Amended) A charging method for a portable equipment employing the charging system as defined in Claimclaim 4, comprising:

the step of fixing said charging device onto a plane perpendicular to the ground;

the step of passing said induction core through said charging arch; and the step of holding said portable equipment suspensibly attached to said induction core for a predetermined time period.
